Own Your Cloud Experience

Your business groups need new applications fast.

How can you enhance IT agility without giving up control or adding complexity?

Lenovo

Challenges of Traditional IT

- Provisioning bottlenecks
- Complex, time-consuming maintenance
- Technology fiefdoms
- Shadow IT and precarious protection
- Interoperability challenges and inefficient scaling

Benefits of a Composable Cloud

- On-demand IT resources
- Intelligently automated management
- Holistic, application delivery–focused workforce
- Intelligent automation of compliance and security best practices
- Optimized IT operations

Enable your intelligent transformation with Lenovo ThinkAgile CP Series.

Break free from traditional IT with a fully integrated, all-in-one composable cloud—a new way to deliver applications.

Deploy applications differently with Lenovo ThinkAgile CP Series.

Enable demand-driven delivery of IT
- Fulfill IT requests in minutes with automated self-service
- Streamline provisioning with an application marketplace

Intelligently automate management
- Deploy a fully integrated private cloud in minutes
- Scale network, compute, or storage independently

Support a holistic, application delivery–focused workforce
- Deploy applications and infrastructure from a simple GUI
- Create a remote disaster recovery policy in five mouse clicks

Intelligently automate compliance and security best practices
- Keep application data and resources within your control
- Isolate applications and virtual data centers with automated policies

Optimize IT operations—increase productivity, lower costs
- Simplify management and reduce the need for high-level expertise
- Automate updates and streamline maintenance
