WHAT TO EXPECT FROM LENOVO QUALIFIED TECHNICIANS

Your Lenovo qualified technician's job is to get your new Lenovo fleet ready to go so your people can get to work. Here's what you can expect from Lenovo with Easy Deploy...

1. DELIVER

Once you confirm your new equipment has arrived, we'll unpack and inspect your devices to ensure they're ready to use. We'll deliver everything to the right desks then organize product components and peripherals so deployment can proceed without a hitch.

2. CONNECT

Lenovo qualified technicians will then connect and set up peripherals (keyboard, mouse, monitor, local printer, docking station, etc.), plug it all in and power up the machines. We verify your network connections and perform a basic domain join through the Microsoft Windows native interface. Technicians carefully test each connection and login.

3. SETUP

We log on using the credentials you supply and map network printers to each PC. We'll get Microsoft Office and email working. For the Easy Deploy Plus and Advanced options, Lenovo qualified technicians will migrate settings and data to the new devices.

4. CLEAR OUT

Before leaving, your technician cleans up, tidying work areas and removing boxes, packing materials and debris for disposal onsite. We'll make sure the deployment has been completed to your satisfaction before final signoff.

ADD EASY DEPLOY TO YOUR LENOVO FLEET

Select Easy Deploy Basic, Plus or Advanced when you purchase your devices online. Or ask your Lenovo rep which plan is right for your organization.
